WORK IN PROGRESS

Competitive effect of Private Equity backing in Initial Public Offerings- France market

In this paper, I analyze the competitive effect of initial public offerings (IPOs) of a private firms and explore the impact that private equity-backing has on competitor's market return.

The role of the Private Equity investor in the European acquisition of a private company.

In this project, I examine the characteristics of acquisition of private firms by public companies and the impact that private equity-backing has on the acquirer's return, acquirer's characteristics, and the form of payment.
